

ENVIRONMENTAL POLICY

H₂O Chemicals Ltd operates in the fields of Water Treatment, Water Hygiene, Air Hygiene and Training Services. The company provides a range of chemicals and services to reduce scale corrosion and micro-biological fouling in water systems, as well as services and consultancy to ensure the quality and cleanliness of indoor air.

H₂O Chemicals recognises environmental management as an important responsibility.

We are committed to conduct operations and provide services in a manner that is responsible to the earth's environment and protective of its natural resources.

The Managing Director is responsible for the implementation of this Policy.

Each employee has an important contribution to make and the company will train and encourage all employees to operate in an environmentally responsible manner.

We will:-

- Comply with all relevant environmental laws as a minimum.
- Promote a programme to reduce or eliminate the source of waste including energy and hazardous materials by the use of best practice and technology
- Promote the re-use and re-cycling of waste and reduce energy use.
- Commit to a programme of continuous improvement.
- Selection of products and services (including company vehicles) based on their environmental impact in conjunction with commercial considerations
- Implement controls to ensure the safe storage, transport and use of all chemicals supplied by H₂O Chemicals Ltd.
- Communicate with customers, employees, suppliers and contractors to promote awareness of environmental issues.
- Implement controls and training to ensure all relevant employees are prepared for emergencies.
- Monitor performance to agreed targets.
- Regularly review this policy
